

“

Dear Mr. Dragiew,
since 1994 you are my reliable partner in all interior development projects. Our cooperation in numerous projects that we were allowed to design together, started mostly with the demanding criteria of Feng Shui.

From 1999, the office expansion and the internals were added within production facilities, mostly for the aerospace industry, which were created according to strict fire and sound insulation criteria.

At any time, I could and can rely on the very high quality of the execution, which is especially in the details of its completion, in the certainty of having purchased the works for a well-balanced price-performance ratio.

So I wish you continued success and enjoyment of your challenging projects, because I know you love the challenge. And we wish you continued successful cooperation. I recommend you to every client who wants to make a nice object shine. Highly recommend! Best wishes to you and your team.
