Ray saves the day!

Dear Ray,

words cannot begin to express my gratitude for your miraculous reconstruction of my apartment. I want to thank you from the bottom of my heart for not giving up on this project even after we discovered unforeseen problems with the apartment's building substance and had to completely change our original plans. We went from what we thought would be an simple renovation to a complete gutting of the apartment and reconstruction.

Your thirty-year experience in the construction business, your high professional ethics and practical, hands-on attitude were invaluable in tackling the wide variety of problems which inevitably arose. You accompanied us all the way, and helped us with a variety of tasks, including making important decisions regarding the construction work, purchasing fixtures, dealing with the building's administrators and Berlin city bureaucracy. In addition to your excellent communication skills - which included keeping us constantly informed of each step of the construction work with photos- I also greatly admired your passion for your work.

Very early on, I realized that my project had become your project and you gave it everything you had! And it definitely shows! Thank you!
